Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 10 and 11 drawn to a first method for “facilitating exploration” of data, based on gene expression data, and a system therefor, classified in class 702, subclass 19.
- II. Claims 7-9 and 12, drawn to a second method for “facilitating exploration” of data, based on drug signatures, and a system therefor, classified in class 702, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Each method is distinct from the other, as they each comprise differing steps, requiring differing data, and performing differing manipulations of data. As such, each method would require a search that is not substantially coextensive in scope, and would pose an undue burden upon the examiner if not restricted.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the
